

HCC-E Active Criminal Event Considerations

Training Resources

Safety and Security Courses

Situational Awareness. In-person / informal Lecture. 1.5 Hours. (Practical Application)

This training course is designed to educate staff on the basics of situational awareness. Additionally, this course offers tips and tools on how to enhance and apply situational awareness on a daily basis in order to reduce risk and promote safety. Lastly, this course offers a brief snapshot of a few basic crime statistics, both national and local, in order to boost crime awareness.

De-escalation Strategies. In-person / informal Lecture. 1.5 Hours. (Scenario Simulations)

This training course offers practical tools for verbal de-escalation to help staff members respond appropriately to a person in crisis. This training course is designed to familiarize staff members with basic customer service issues and the application of workplace violence diversion methods.

Active Criminal Event: Response. In-person / informal lecture. 1.5 Hours. (Full presentation available to watch on ULearn. Summarized Module also Available)

This course is intended to familiarize staff members with the various levels of workplace violence and corresponding response procedures. In addition, this course provides staff members with an understanding of what an Active Criminal Event is and how to recognize such criteria. Included in the course is a brief history on mass shooting events, the corresponding themes, and instruction on proper Active Criminal Event response protocols as per CCMC guidelines and safety education (*Avoid, Deny, Defend*).

Self-Defense Courses

RAD: Systems of Self-Defense. (Two Hour Training Sessions)

R.A.D. (Rape Aggression Defense) is a women's self-defense course which consists of safety and situational awareness education, physical skill instruction, and dynamic role-play scenarios. The overall breakdown of the class equates to approximately 25% classroom and 75% physical application. In this course, students will learn to block, strike, kick, escape from holds, and exploit vulnerable locations and pressure points, among other things. Students will use their skills in dynamic settings consisting of pad training and simulated attacks Students must complete four full sessions to receive Vitality points.

ASD: Advanced Self-Defense. (Two Hour Training Sessions)

Advanced Self-Defense is a functional, adaptive, and dynamic self-defense program available to all Cook Children's employees. This self-defense training curriculum expands on the fundamentals of the RAD program; consisting of safety and situational awareness education, physical skill instruction, and dynamic role-play scenarios. In this course, participants will learn advanced principles of movement, block and counter techniques, strikes, kicks, and escape techniques. Participants will also have the option to use their skills in dynamic scenarios involving movement, training pads, and against a padded aggressor suit. Students must complete four full sessions to receive Vitality points.

AVOID DENY DEFEND

CIVILIAN RESPONSE TO ACTIVE SHOOTER EVENTS

Active Shooter Response Training

Online Module (Condensed Version) – 15 min

Online Presentation – 1.5 hours

In-person Presentation – 1.5 hours

Additional Resources

Security Alert: Active Criminal Event

Workplace violence: Aggressive or disruptive behavior in the workplace that may include verbal or physical harm, threat of physical harm, harassment or intimidation.

- Level 1: Foul language, derogatory comments, unwholesome behaviors which includes unwelcome words or actions.
- Level 2: Physical contact NOT resulting in physical harm to another person. Language or action that threatens, intimidates.
- Level 3: Property damage, the destruction or threat of destruction of property or another person's personal property.
- Level 4: Physical harm to self or others (This includes response to a Security Alert: Violent Event).

Security Alert: Active Criminal Event: This code is called in the event of a violent incident or threat of immediate violence against or by employees, patients or visitors. A Security Alert is not intended to be called in situations of non-threatening verbal confrontation.

Panic Alarms: Be aware of alarm locations and understand functionality.

Lockdown Procedure: Facility lockdown possible for confirmed violent event at or within half mile of location; AOC will be contacted to determine best facility response.

Active Shooter Trends: Active shooter events are sporadic in nature, causing chaos and confusion. Incidents involving active shooters develop quickly and typically last between two to five minutes. *(FBI Case Study from 2000-2013.)*

Warning Signs: Grievances, violent ideation, research and planning, probing or testing.

Behavioral Signs: History of intimate partner violence, abusive language, workplace intimidation, outbursts of anger, concerning social media content, increased use of alcohol or drugs.

3 Fold Responsibility: 1) Develop a plan. 2) Train the plan. 3) Report suspicious activity.

Immediate Response: Activate panic alarms. Call 51111. Inform security if possible.

When speaking to PBX, inform them there is a Security Alert and provide the location. Be prepared to provide other details if you are not in immediate danger. After notification is made, evaluate safest option:

- 1. Clear the violent individual's line of sight, create distance, and evacuate yourself and others if possible.
- 2. Move yourself and others to areas of refuge: Secure all doors, barricade in place, silence phones, and hide.
- 3. As a last resort, be prepared to defend yourself if confronted by the violent individual.

Avoid. Deny. Defend.

If confronted by the violent individual, the last resort is to defend yourself by any means necessary:

Utilize *Windows of Opportunity, Weapons of Opportunity,* and the *SWARM* technique. The goal is to *Distract, Disorient, and Disable* by any means necessary.

Considerations:

It is possible fire alarms may be activated after weapons are discharged; do not depart areas of refuge unless obvious signs of fire are observed and represent an immediate danger. Once inside your area of refuge, do not open the door until you can confirm there is no longer a threat. Following a shooting event, the area will be a crime scene and must be preserved; do not remove items or return for belongings until given permission by the proper authority.

*Active Criminal Event online training module available in ULearn.

*Active Criminal Event in-person training course available for registration in ULearn.

On-Campus Hospital Armed Assailant Planning Considerations

Hospital planners can use this checklist to help prepare their facilities to mitigate, respond to, and recover from an active shooter or armed assailant situation on campus. In an actual emergency, follow facility protocol for armed assailant/active shooter codes. Inform 911 and use your internal approach for alerting security and other healthcare facility personnel of the incident. **Notes**: this checklist does not include considerations related to being trapped with an assailant or other hostage/victim scenarios. URLs are only provided for resources that are available at no cost. Additional resources from the International Association for Healthcare Security and Safety (IAHSS) and other organizations are available to members. Though principally designed around hospital needs, this document may be valuable to other types of healthcare facilities. The checklist is broken into four phases (mitigation, preparedness, response, and recovery). Plan components/promising practices and resources are provided for select issues by phase.

January 2023

iolence Prevention	
omponents/Promising Practices	Resources
by emergency department [ED] nurse station, internal 911, wearable or digital duress/panic buttons, 911 PSAP, "blue light" cameras on campus). Create a tracking system for all violent threats and incidents. Develop security, human resources, department, and staff policies for high-risk/high-profile inpatients (e.g., VIP, gang-related violence, gunshot wounds, aggressive patients) including checking for hidden weapons, using metal detectors, limiting or restricting visitors during high-risk times, and discharge processes.	 ASPR: Incorporating Active Shooter Incident Planning into Health Care Facility Emergency Operations Plans Cybersecurity & Infrastructure Security Agency: De-Escalation Series Federal Bureau of Investigation (FBI): Active Shooter Planning and Response in a Healthcare Setting IAHSS Guidelines - Workplace Violence Bundle IAHSS Guideline on Incident Categories and Data Analysis IAHSS 01.09 Violence in Healthcare Guidelines IAHSS 01.04 Hazard Vulnerability Assessment Guidelines IAHSS 04.01 - 04.10 Systems Guidelines The Joint Commission: Workplace Violence Prevention Resources OSHA: Worker Safety in Hospitals: Caring for our Caregivers ASPR TRACIE Resources Strategies for Healthcare Workplace Violence Prevention: Risk Assessment and De-Escalation (Webinar) Trends, Policies, and Protocols Related to Healthcare Workplace Violence Workplace Violence Topic Collection Education and Training Healthcare Settings Information Sharing Topic Collection Evaluation of Hazard Vulnerability Assessment Tools
	exercising, categorizing certain events and actions or patients as "high risk." The multidisciplinary workplace violence committee should meet regularly to review data and make recommendations for changes. Provide rapid reporting process for staff with concerns (e.g., "red phone" by emergency department [ED] nurse station, internal 911, wearable or digital duress/panic buttons, 911 PSAP, "blue light" cameras on campus). Create a tracking system for all violent threats and incidents. Develop security, human resources, department, and staff policies for high-risk/high-profile inpatients (e.g., VIP, gang-related violence, gunshot wounds, aggressive patients) including checking for hidden weapons, using metal detectors, limiting or restricting visitors during high-risk times, and discharge processes. Provide de-escalation training to all staff based on their assessed risk for exposure to workplace violence (e.g., as determined by a Workplace Behavioral Risk Assessment). Hazard Vulnerability Analysis (HVA) should consider armed assailants and/or a specific risk assessment for armed assailants. Monitor threats via social media, major media, law enforcement (LE) partnership (e.g., Fusion Centers, InfraGard, homeland security districts,

Violence Prevention Components/Promising Practices Resources ☐ Meet with local first responders and provide leaders with a campus map U.S. Department of Homeland Security: National Threat Evaluation and with potential hotspot areas identified (e.g., ED, ICU, labor and delivery, Reporting (NTER) Office U.S. Department of Veterans Affairs. Implementing Multidisciplinary nursery, pediatrics, oncology). ☐ Provide suspicious activity reporting and behavioral threat assessment Behavioral Threat Assessment and Management Practice in Health Care: and management training to all staff. Disruptive Behavior Committee (DBC) Guidebook ☐ Define violence prevention's scope of practice, which should cover a wider range of concerning incidents that are the precursor for violence. These incidents include harassment, bullying, domestic violence, as well as threats against an individual or a facility. ☐ Develop and exercise a process for accountability of patients, staff and visitors. **Facility Design Features Components/Promising Practices** Resources ☐ Consider implementing these design features: Center for Safe Schools. Model Door Numbering System Bulletproof barriers/glass in at-risk areas (floor to ceiling) IAHSS Security Design Guidelines for Healthcare Facilities-3rd Edition Sequential controlled areas/controllable areas IAHSS 04.01 - 04.10 Systems Guidelines One-way windows/glass Code compliant just-in-time lockable doors or easy to apply hardware ASPR TRACIE Resources to lock/block unlockable doors Violence in the Emergency Department: Strategies for Prevention Safe rooms (ensure these are documented in your armed assailant and Response procedure and staff are aware of locations via training and reminders) Information Sharing Topic Collection Hospital Active Shooter and Door Control Resources for Active Violence to possibly be constructed of ballistically rated (level III minimally) Incidents (TA Response, 2019) sheet rock and include: Hospital Lockdown Procedures (TA Response, 2020) Peep sights (for occupants to confirm LEO presence prior

to exiting)

Intercom or networked hardline phones

Camera monitoring inside the safe room

Prominent signage/marking indicating secure area(s)

An internal dead bolt to override card reader entrance

No exterior ground floor windows

Fa	acility Design Features	
C	omponents/Promising Practices	Resources
	outside to reference when calling for help. Provide local first responders with map/key. Ensure signage in all stairwells/landings communicates ability to exit to outside and directional information (e.g., south tower, SE stairwell) to improve location precision for responders/facility staff. Include relevant emergency phone numbers. Per local and state ordinances and statutes, provide ability to lock department and/or fire doors by floor/unit from secure location(s). Provide ability to lock stairwell doors to allow exit while preventing entrance. Avoid "dead end" units/workrooms that are not lockable/controlled. Ensure access to controlled units – particularly for high-risk and high dependency patient areas (ED, ICU, nursery, pediatrics, psych). Communications throughout facility Overhead paging Computer-based alerting Phone/paging alerts Public Safety and Security radio (no "dead zones") Emergency call boxes in remote locations of the facility (e.g., parking garages) Emergency signage	

Video Monitoring Components/Promising Practices Resources ☐ Monitor all entrances/exits, elevator lobbies, hallways, loading docks, and ASPR TRACIE Resources Trends, Policies, and Protocols Related to Healthcare Workplace Violence other key areas. ☐ Link local cameras to mobile devices (e.g., tablets) for facility security and Violence in the Emergency Department: Strategies for Prevention local first responders. and Response ☐ Label cameras to ensure SOC dispatcher can read off the camera name and provide critical real-time information as to the location of a suspect or IAHSS 04.04 Video Surveillance Guidelines their last known direction of travel. • If the camera is covering an exterior access point, include the street name onto which the doors open. ☐ Larger facilities may benefit from having designated camera layouts/ templates that allow a team to select a specific area of department or floor to view. ☐ Ensure ability to record data and bring up images/search on outside computers (redundant system). ☐ Place monitors/recorders on emergency power. **Public Entrance Control Components/Promising Practices** Resources ASPR TRACIE Resources ☐ Limit visitor/patient entrances. ☐ Develop protocols for the screening of individuals that may enter the Violence in the Emergency Department: Strategies for Prevention building (e.g., visitors, vendors) before, during, and after an incident. and Response ☐ Develop and implement screening protocols of employees (particularly Hospital Lockdown Resources (TA response, 2022) when there is a threat or concern). ☐ Conduct visitor and vendor intake/badging at predetermined entrance(s). IAHSS 04.03.03 Facility Restricted Access (Emergency ☐ Strongly consider a metal/weapons screening program for patients Lockdown) Guidelines and visitors (including ambulance arrivals and wanding after initial assessment). ☐ Enforce policies on limiting visitors during high-risk periods/for high-risk patients. ☐ Develop access control plan that includes considerations for full, partial, and zoned lockdown.

	Support for Responding LE	
	Components/Promising Practices	Resources
PREPAREDNESS	 Place go-kits/equipment at facility/campus entrances/reception desks. Equipment such as radios (ensure chargers are on emergency power), and hemorrhage control kits may also be included. Provide remote opening capability if possible. Train facility security to hand radios (that have been preset to an independent channel) to LE to facilitate communications and continuity of operations. Review procedures for patient relocation and full facility evacuation, with a focus on maintaining patients within the facility to the extent possible. Exercise LE-hospital interactions and consider LE liaison role. Discuss these protocols prior to finalizing plans. Include crime scene issues in discussion with LE (e.g., need to rapidly re-open patient care areas after an event – particularly in the ED, ICU, etc. and how both LE and hospital needs are balanced). Provide staff in high-risk areas with basic training for evidence collection. Have hospital leadership team meet/train with local LE command and Fire/EMS command to be clear on roles and responsibilities and rehearse establishing unified command. Instruct hospital staff on specific LE information reporting needs during an active shooter event. Develop and regularly update a document that provides guidance to LE as to which floors/departments would be ideally swept/cleared first. Consider prioritizing ICU, surgical services, ED, and blood banks. If these areas can be cleared and held, lifesaving operations can continue/resume ASAP. Meet with LE public information officer to review messaging approaches and strategies for social media, press releases and press conferences. Ensure that the hospital has a pre-determined liaison officer working with the LE incident commander to prevent putting themselves or patients at risk during their response. 	

Identifying Refuge/Escape Options Components/Promising Practices Resources ☐ Provide clear exit/stair markings. Inaba, K., Eastman, A., Jacobs, L., and Mattox, K. Active-Shooter ☐ Hold unit/office-based "Run/Hide/Secure-Fight" training to identify exits/ Response at a Health Care Facility refuge rooms, potential escape routes, weapons/barricades. ☐ Ideal room characteristics include size (to hold multiple personnel spread out), a solid door that opens in and can be locked from inside, items □ to block the door, phone to call for help, and items to use for personal defense if needed. ☐ Stock with hemorrhage control kits. **Staff Policies and Training Components/Promising Practices** Resources ☐ Ensure clear policies during active violence event, for example: ASPR TRACIE Resources Shelter on unit actions unless imminent threat on the unit **Exercise Program Topic Collection** Specific patient protection actions by unit and location of violence Discussion-Based Exercise Templates: Active Shooter Run-hide-fight or similar assailant response philosophy if staff Operations-Based Exercise Templates: Active Shooter member is in direct danger (assailant on unit) Active Shooter Drill and Evaluation Resources (TA Response, 2018) ☐ Ensure that temporary staff (e.g., travel nurses) are informed about facility Active Violence Exercise Templates for Healthcare Facilities (TA policies including alert/emergency codes. Response, 2019) ☐ Develop pre-messages (with details added, repeated, and updated) for paging and computer-based notification systems. California Emergency Medical Services Authority. Hospital Incident ☐ Collaborate with first responders on evacuation plans so they understand Command System: Active Shooter Incident Planning Guide. facility- specific considerations (e.g., patients that are not able FEMA: IS-907: Active Shooter: What You Can Do; IS-904: Active Shooter Prevention: You Can Make a Difference; IS-905: Responding to an to evacuate). Active Shooter: You Can Make a Difference; and IS-906: Workplace ☐ Identify a "monitor" for every floor or unit for each shift that can assist with basic emergency procedures for the given area (e.g., evacuation). Security Awareness ☐ Provide training (initial and refresher) and regular exercises that include IAHSS 08.09 Active Shooter/Hostile Event Response Plan Guidelines active violence scenarios with and without first responders to understand IAHSS 01.09 Violence in Healthcare Guidelines policies and practice/memorize procedures. IAHSS. Workplace Violence Training and Prevention in Hospital-Based ☐ Repeat messaging to staff about not allowing "piggybacking" or Healthcare: Implications for Nursing and the Interdisciplinary Team in "tailgating" (allowing an unknown person to trail in behind them through an the Hospital IAHSS. Mitigating Workplace Violence via De-Escalation Training opened door).

Security Policies Components/Promising Practices Resources ☐ Create policy for response and degree of engagement of assailant (based ASPR TRACIE Resources on capabilities of security team). Active Shooter and Explosives Topic Collection ☐ Develop policies for alerting/notification/callbacks internal and external. Guidance Documents ☐ Create and share a plan for integrating with responding LE (e.g., providing LE a spot in the command post/center). ☐ Address management of on-coming staff arriving during or following an incident (e.g., where to enter, park, show identification). **Medical Response Policies Components/Promising Practices** Resources Security/LE clearing of the area must precede medical response. ASPR TRACIE Resources Determine role of local EMS on-campus for victim care and movement. DASH Tool: Trauma Supply Module Fire/EMS patient care and movement may be preferred to in-house Active Shooter and Explosives Topic Collection medical teams. Plans. Tools. and Templates Moving patients directly to ambulances may be preferred at facilities Workplace Violence Topic Collection that do not usually manage penetrating trauma - however, an on-site Plans, Tools, and Templates triage/assessment by facility staff is optimal prior to transfer. **EMTALA** and Disasters Augment "code team" and supplies/carts as required. ☐ Acquire hemorrhage control kits to support medical response. Pennardt, A. and Schwartz, R. Hot, Warm, and Cold Zones: Applying ☐ Ensure personnel who respond to these situations have trauma Existing National Incident Management System Terminology to Enhance Tactical Emergency Medical Support Interoperability care experience. ☐ Discuss with regulatory staff any Emergency Medical Treatment and Active Labor Act (EMTALA) issues related to victims being removed by EMS without being assessed by hospital staff if transporting to another hospital (e.g., trauma center). Determine whether victims will receive a medical screening exam and emergency stabilizing treatment on-site if the facility is not a trauma center and if so, how this will be documented. If the facility is a trauma center, ensure process for rapid patient movement to the emergency department resuscitation area.

	Medical Response Policies	
	Components/Promising Practices	Resources
PREPAREDNESS	 Determine how to provide medication or other needed assistance to patients in warm (area where a potential threat exists, but there is no direct or immediate threat) or hot zones (area where a direct and immediate threat exists) who can't be evacuated. Provide employees working in dietary, supply chain, lab, radiology, respiratory therapy, or pharmacy who may be in an affected area with appropriate training and ensure they understand expectations regarding communications and accountability processes during and after an incident. Perform related unit tabletop exercises regularly and functional exercises on a yearly basis. 	
	Activation and Notification	
	Components/Promising Practices	Resources
RESPONSE	 Ensure facility security and clinical and support staff are aware of who to notify externally and what information to share when reporting active shooter/active violence such as: Location of the incident (hospital, building, floor/area, and room) The number of armed person(s) and their behavior Type of weapon(s) involved (e.g., handgun, long gun, knife, bomb) Physical description of armed person(s) if any (may wish to prompt for footwear description as unlikely to change) The number of hostages, if applicable Closest entry point for LE Vehicle make and model, license plate, and direction of travel (if the perpetrator flees the scene in a vehicle) Ensure messaging is specific to the facility involved (i.e., not disseminated throughout an entire healthcare system). When using overhead paging use plain language and share last known suspect location (e.g., "Security Alert - Gunshots reported medical ICU 1, 4th floor"). Update as situation evolves. 	 ASPR TRACIE Resources Active Shooter Resources and Secure-Preserve-Fight Model (TA Response, 2019) Incident Management Topic Collection Information Sharing Topic Collection FBI: Active Shooter Planning and Response in a Healthcare Setting Hospital Incident Command System – Incident Response Guides IAHSS 08.01 Emergency Management General Guidelines IAHSS 08.02 Security Role in the Emergency Operations Center Guidelines IAHSS 08.09 Active Shooter/ Hostile Event Response Plan Guidelines

	Activation and Notification								
	Components/Promising Practices	Resources							
RESPONSE	 Ensure in-hospital notifications are prioritized; also ensure all staff are notified when a threat is ongoing to prevent off-duty staff from reporting to work unnecessarily. Ensure incident command group notification systems are in place for inperson or virtual command center activation. Notify ambulance services of the situation if it is affecting the emergency department (i.e., diversion). Implement facility access control procedures and prohibit walk-in traffic. Designate by policy initial incident commander (IC) until LE arrives (e.g., security supervisor) then liaison with LE IC until threat controlled. Consider activation of full hospital incident command system when safe to do so (this enables entire team to handle internal and external messaging, for example). Monitor and share situation information/size up based on calls, on-scene officers, and related details. Unified command with LE should be in forward command post or hospital command center. Liaison with responding fire/EMS agencies. Support threat containment actions. Determine scope of ongoing facility operations during the active incident. Once the threat is neutralized, continue hospital command center operations for further actions centered on restoration and recovery. 								
	Integrated First Responders and Facility Response								
	Components/Promising Practices	Resources							
	 □ Plan for facility security staff to accompany/ trail initial LE for navigation. □ Share facility infrastructure plans for the area of the incident (e.g., medical gas lines in the walls) to facilitate damage assessment. □ Integrate LE into security office early to monitor CCTV/video and establish unified command. Ideally "right seat" them with security supervisor operating the cameras and provide phones, internet access and electrical outlets for their use. 	ASPR TRACIE Resources Active Shooter and Explosives Topic Collection Plans, Tools, and Templates IAHSS 08.02 Security Role in the Emergency Operations Center Guidelines

	Integrated First Responders and Facility Response						
	Components/Promising Practices	Resources					
	 Provide virtual access to camera views, if possible, to LE (e.g., on tablet or via link sent to command center). Assess the operational status of all units and buildings on campus including any damage to the facility, equipment, or supplies. From LE IC confirm: What areas are crime scenes and off limits? Is there any ongoing threat? 						
	Containment/Neutralization						
ONSE	Components/Promising Practices	Resources					
RESP	 Ensure/create joint prioritization/policy of first responders and security to localize and contain/neutralize any threat. Evacuate around contained threat – perimeter determined by circumstances. Access controls planning –lockout elevators, close fire doors, etc. as needed/possible to contain threat. Plan for different event durations. Is event over "quickly" or has it become a longer-term incident with a barricade or hostage situation? Ensure that someone from the healthcare organization continues to monitor patients located in the containment area(s). Patient movement and care strategies might have to be developed in real time with LE to save lives. If it is a longer-term incident, plan with LE how patient care operations can continue safely in affected and unaffected areas 	ASPR TRACIE Resources Active Shooter and Explosives Topic Collection Plans, Tools, and Templates					

	RESPONSE	Rescue
		Components/Promising Practices
		 Clear policies with LE about "contained threat" (i.e., casualty access/ evacuation once an area is secured but there is ongoing potential threat). Determine staging area for medical personnel (e.g., hospital or EMS providers) in the cold zone (the area where no significant threat is reasonably anticipated and additional medical/transport resources may be staged) to respond from once threat is contained/neutralized. Create plans/policies for moving the injured. Ensure adequate first responder/ provider/ EMS/ security to move victims and fabric carriers/ drag carriers/wheelchairs/ carts available. Predetermine "safe area" for victim assessment after initial rescue. Assess victims and determine any emergent intervention (e.g., tourniquet) needed prior to rapid movement to ED or ambulance to other hospitals for additional care. Alert other hospitals of possible patient transfers. Plan to arrange patient transport via on-scene EMS as practical. Include transport plans for patients in ED prior to the incident if evacuation needed If EMS is transporting from the incident hospital to a trauma center assure initial assessment and stabilizing interventions to the degree possible before transport
		Accountability

Resources

ASPR TRACIE Resources

- Active Shooter and Explosives Topic Collection
 - Injuries and Treatment
 - Plans, Tools, and Templates
- Pennardt, A. and Schwartz, R. Hot, Warm, and Cold Zones: Applying Existing National Incident Management System Terminology to Enhance Tactical Emergency Medical Support Interoperability

Components/Promising Practices	Resources
 Maintain accountability process for all patients, staff, and known visitors. Determine if any patients/staff are missing. Plan with LE and facility security to clear staff to re-enter building/units to resume patient care. 	

Internal Communications Components/Promising Practices Resources ☐ Communicate (per unified command decision) the "all clear" to **ASPR TRACIE Resources** Risk Communications/Emergency Public Information and Warning on-site staff. ☐ Share initial information with patients and staff via a variety of platforms. **Topic Collection** ☐ Pre-determined facility leaders should directly communicate with staff and Social Media in Emergency Response Topic Collection patients on affected units. ☐ Pre-determined facility leaders should provide initial update on injuries. FBI: Active Shooter Planning and Response in a Healthcare Setting including injuries to staff. ☐ Determine timeline and mechanism for communicating degree of injury/ death particularly if staff member injured/killed in conjunction with family notification(s); determine who will make notifications. ☐ Communicate with staff who were offsite during the incident. Include event summary and all clear, and list impacted services and areas if applicable. **External Communications Components/Promising Practices** Resources ☐ Create pre-scripted messaging, modified for event initial summary and ASPR TRACIE Resources any communication of impacted services as immediate media release/ Risk Communications/Emergency Public Information and Warning social media posting. **Topic Collection** ☐ Remind staff of social media policy. Social Media in Emergency Response Topic Collection ☐ Be ready to dispel rumors. ☐ Determine with LE whether and when/where to conduct joint press conference and what information to share. If LE does not wish to participate in a joint press conference, the facility should proceed with one in a timely manner. ☐ Schedule press conference(s) at appropriate location and time, determine speakers and content. ☐ Monitor press, radio and social media and correct misinformation. Determine timeline and content for additional release of information on extent of injuries/deaths.

in person

Expanded access to restrooms and electrical outlets or portable battery chargers to charge electronic devices while waiting

Mental health support for patients, visitors, and staff

Service Restoration Components/Promising Practices Resources ☐ Determine any services that need to be relocated due to damage/ ASPR TRACIE. Healthcare Facilities Engineering Evacuation Checklists. extended lockdown/crime scene investigation. (TA Response, 2020) ☐ Reschedule or relocate elective and outpatient procedures as required. ☐ Clear areas/campus to return to normal activities as permitted by LE (agreed to with leadership – some services in the area may be temporarily discontinued). ☐ Inspect infrastructure lines within the incident site to ensure they are not damaged/ leaking (e.g., medical gas, water, sewer). ☐ Repair, decontaminate, or otherwise address any damage to the facility/ physical evidence of event as soon as cleared to do so by LE. · Consider need to hire outside vendor rather than staff handling restoration (especially in trauma-laden areas) **Family Support Components/Promising Practices** Resources ☐ Ensure family reunification and assistance plans include the following: ASPR TRACIE Resources Additional operator staffing for large volumes of inquiry / Family Reunification and Support Topic Collection information calls Tips for Healthcare Facilities: Assisting Families and Loved Ones after a Space and staffing (by facility personnel, security, and community Mass Casualty Incident groups/volunteers as needed) of a family support center as required Availability of trained staff to talk with loved ones via phone or

these types of incidents prior to an occurrence.

	After Action			
	Components/Promising Practices	Resources		
RECOVERY	 □ Conduct initial incident debrief (hotwash) with directly involved security and clinical staff; establish common understanding of the events and any initial feedback about systems successes and areas for improvement. □ Activate formal after-action analysis process including improvement plan (integrate first responders into after action process). □ Identify any facility legal issues in conjunction with LE/legal counsel and determine handling of materials, reports, and communications. □ Institute action plan to address identified areas for improvement. 	ASPR TRACIE. <u>After Action Reports - Real-Life Events from the Hospital/</u> <u>Health System Perspective</u> . (TA Response, 2019)		
	 Consider the potential need to remodel an affected area to improve safety and reduce negative associations with the event. 			
	 Consider updating policies and procedures and comprehensive emergency management plan with findings and improvements following the incident. 			

ASPR TRACIE would like to thank the following subject matter experts for their review and contribution to this planning document (listed alphabetically): Josh Adler, Director, Central Region Security Services, Northwestern Memorial Healthcare; Eric R.
