

EMResource Policies & Procedures – February 2020 Updates

Statuses

- *Changes*
 - “Hospital Intake Status”
 - Change “Advisory” to “Advisory – Capability” to clarify the difference between a clinical service line failure (“Advisory – Capability”) versus a capacity-related advisory (“Advisory – Surge”)
 - “Status: 24/7 STEMI”
 - Changed status options to remove reference to PCI; only “Available”, “Unavailable”, or “Not Provided” now.
- *Additions*
 - “Status: Trauma”
 - Reflects the current status of a facility’s ability to provide Trauma Surgery services. Should be updated as needed.
 - Facilities can select from the following status options. Definitions for each status option are provided.
 - Available: This facility can currently provide Trauma Surgery services.
 - Unavailable: This facility is temporarily unable to provide Trauma Surgery services. Comments are mandatory. This status option must be updated at least once every 4 hours.
 - Not Provided: This facility does not provide Trauma Surgery services.
 - “Status: MedSurg”
 - Reflects the current status of a facility’s ability to provide Med/Surg beds. Should be updated as needed.
 - Facilities can select from the following status options. Definitions for each status option are provided.
 - Available: This facility can currently provide Med/Surg beds.
 - Unavailable: This facility is temporarily unable to provide Med/Surg beds. Comments are mandatory. This status option must be updated at least once every 4 hours.
 - Not Provided: This facility does not provide Med/Surg beds.

Views

- New “EMS/ED” View
 - Narrows down visible statuses to reflect only the essential data points of the ED to EMS communication
 - Will be assigned as the default view to all new ED and EMS users
- New “Transfer Centers” View
 - Narrows down visible statuses to reflect only the essential data points for hospitals (or hospital transfer centers) trying to locate an available facility for patient transfer
 - Will be assigned as the default view to all new transfer center users
