## Bicycle Safety in North Central Texas

The number of bicyclists evaluated at trauma centers in 2017 to the North Central Texas Trauma Service Area

**257**

**23%**

Trauma Centers have reported a 23% increase in bicycle injuries from 2016 to 2017.

**1 in 4**

injured bicyclists were admitted to the intensive care unit

Where bicyclists sustain their injuries:

■ Head, Neck & Face  
■ Chest & Abdomen  
■ Arms  
■ Legs

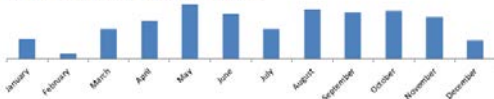

**49%**

It's not just children who are injured riding bikes. Nearly half of injured riders reported to the Trauma Service Area were between the ages of 45-65 years of age.

Only **31%** of injured bicyclists were wearing a protective helmet

Bike crashes happen all year long ...

The North Central Texas Trauma Service Area covers 19 counties including Collin, Cooke, Dallas, Denton, Ellis, Erath, Fannin, Grayson, Hood, Hunt, Johnson, Kaufman, Navarro, Palo Pinto, Parker, Rockwall, Somervell, Tarrant, and Wise counties. Reporting data by local trauma centers is voluntary.

## Bicycle Safety in North Central Texas

### Bike Safely

#### To car drivers:

- Look for cyclists.** Scan the road and sides of the road for bicyclists, especially before making a turn, before opening a car door or pulling from a parking space. Do not drive distracted.
- Allow at least 3 feet of clearance** when passing a bicyclist on the road.
- Yield to cyclists** at intersections and as directed by signs and signals. Allow time for bicyclists to cross the intersection.

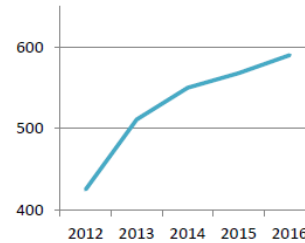

#### To cyclists:

- Wear a helmet.** A helmet is the single most effective way to prevent head injuries resulting from a bicycle crash. All bicyclists should wear a properly fitted bicycle helmet every time they ride.
- Be visible.** Bicyclists should increase their visibility to drivers by wearing fluorescent or brightly colored clothing every time they ride. When riding at night, use a front headlight and a red reflector or flashing rear light.
- Follow the rules of the road.** Bicyclists are considered vehicle operators and are required to obey the same rules of the road as all other vehicle operators, including traffic signs, signals, and lane markings.

For more information on Bicycle Safety visit [www.nhtsa.gov/Driving-Safety/Bicycles](http://www.nhtsa.gov/Driving-Safety/Bicycles)

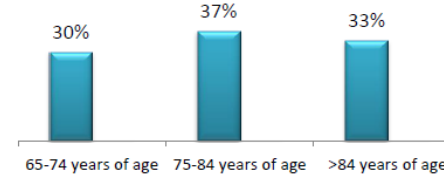

## Falling is NOT an inevitable result of aging

**39%**

Since 2012, there is a 39% increase in the number of **deaths** associated with a fall

#### No age group is more likely to sustain fall injuries

**9,000**

In May 2018, there were over 9,000 emergency department visits because of a fall

**89%**

of older adults

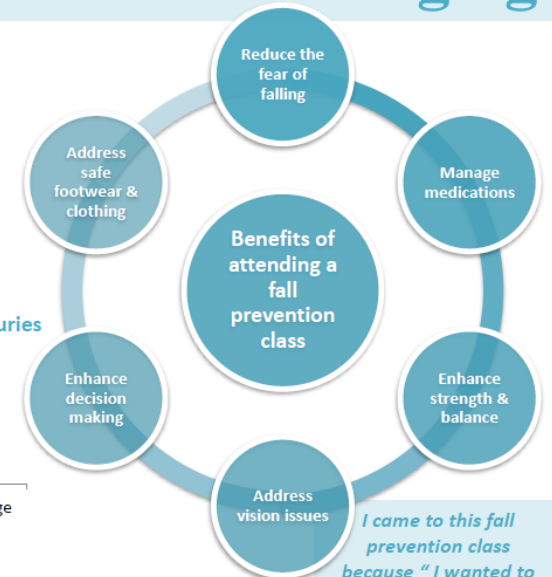

evaluated by a trauma team after their fall were admitted to the hospital

**20%**

of older adults

admitted to a trauma center after a fall were discharged to a home environment

*I came to this fall prevention class because "I wanted to know things I could do to maintain my balance and keep my body under control so I don't fall."  
~ Hector, age 68*

## Falls is the leading cause of accidental death among residents aged 65 years and older

The North Central Texas Trauma Service Area covers 19 counties including Collin, Cooke, Dallas, Denton, Ellis, Erath, Fannin, Grayson, Hood, Hunt, Johnson, Kaufman, Navarro, Palo Pinto, Parker, Rockwall, Somervell, Tarrant, and Wise counties. Reporting data by local trauma centers is voluntary.

# EMResource Workgroup

The EMResource Workgroup is a regional workgroup created by the NCTTTRAC Board of Directors to develop an efficient and useful EMResource product for TSA-E. The workgroup's overall charge is to:

- Improve NCTTTRAC's EMResource organization, utilization, and system data confidence
- Review current configuration and utilization of EMResource as well as additional functionalities that are available and make recommendations to the Board regarding proposed changes
- Develop regional policies to make EMResource relevant and beneficial to care providers and the communities we serve.
- Develop reports to evaluate workgroup outcomes.

Benefits of an optimized EMResource application with high regional utilization:

- (1) Improves patient outcomes by strengthening EMS and Hospital decision support
- (2) Provides enhanced visibility of regional capacity and capabilities for broadened disaster support in patient destination and transportation management
- (3) Provides timely status information for daily operations and for integration with WebEOC for effective coordination with Emergency Management

## Workgroup activities:

- Reviewed current functionality, regional utilization, and best practices and configurations from other regions
- Conducted 2 surveys
