TRAINING

VIRTUAL CRISIS APPLICATIONS TRAINING FOR EMRESOURCE

Description: EMResource is a daily use web-based software that shows the current status and clinical or response capabilities for hospitals and EMS agencies. It is also used to locate the closest available air medical unit and for regional notifications to hospitals and EMS agencies.

 [APRIL 16, 2024 1:00 PM - 3:00 PM](#)

 [JUNE 12, 2024 1:00 PM - 3:00 PM](#)

HOSPITAL EMERGENCY RESPONSE TRAINING (HERT)

Description: This two-day course prepares healthcare responders to utilize the Hospital Incident Command System — integrating into the community emergency response network while operating an Emergency Treatment Area as hospital first responders during an MCI involving patient contamination. The healthcare responders will determine and use appropriate PPE and conduct triage followed by decontamination of ambulatory and non-ambulatory patients as members of a HERT.

TRAINING

ICS 300 - INTERMEDIATE ICS FOR EXPANDING INCIDENTS

Description: This course is intended to serve as a vehicle to share proven incident management strategies and practices, as well as to enhance teamwork and coordination among the agency's mid-level managers and command staff directly responsible for emergency response to all-hazards incidents in which the Incident Command System is employed.

—

 **MARCH 18 - MARCH 20, 2024**

 **WILLOW PARK CITY HALL, 101 STAGE COACH TRAIL, WILLOW PARK, TX**

ICS 400 ADVANCED ICS FOR COMPLEX INCIDENTS

Description: This course is specific to personnel who will be serving in the following positions: command or general staff in an ICS organization, select department heads with multi-agency coordination system responsibilities, area commanders, emergency managers, and multi-agency coordination system/emergency operations center managers.

 **MARCH 21 - MARCH 22, 2024**

DRILLS

REDUNDANT COMMUNICATION DRILL

The idea behind the drill is to ensure that if the primary communication methods (cell phone and email) fail, each member of the healthcare coalition is able to communicate with one another and with NCTTRAC.

Communication Methods: Jurisdictional Commercial/Public Safety Radio, Amateur Radio (**MUST have an Amateur Radio License**), DFW Wide, DFW Connect, Satellite Phone, MSAT.

 **FRIDAY, APRIL 26, 2024 10:00 AM - 12:00 PM**

AMATEUR RADIO TROUBLESHOOTING SESSION

Held the Friday before the drill, 9:00 AM - 11:00 AM

This is to allow partners time to troubleshoot any issues they may have with radio communications, before the actual drill. (**MUST have an Amateur Radio License**)

MCI PATIENT SURGE CAPACITY REPORTING DRILL

During an MCI, hospitals are asked to report their immediate MCI Patient Surge Capacity numbers in EMResource

- MCI Patient Surge Capacity numbers are reported according to START Triage categories (**Green** = Minor/Walking Wounded, **Yellow** = Delayed, **Red** = Immediate/Critical, **Black** = Deceased)
- Hospitals receive email/text notifications from EMResource prompting them to report their MCI Patient Surge Capacity numbers during real-world MCIs and during MCI Reporting Drills.

Drills are performed monthly.

Hospitals are required to participate in at least one MCI Patient Surge Capacity Reporting Drill each quarter.

DRILLS

PATIENT TRACKING DRILLS

These drills will give both EMS and Hospital partners a chance to work in Pulsara with adding and receiving patients as you would in a Real-Life MCI.

THURSDAY, MARCH 21, 2024

Patient Tracking Drills will be conducted monthly utilizing Pulsara.

- Participants registered will receive an email a few days prior to the drill with specific instructions.
- Participants will be given 1-Hour (10AM-11AM) on the day of the drill to complete the instructions given in the email.

Partners registering for the Monthly Patient Drills **MUST** have the following **COMPLETED** before the drills to participate:

- Have an **ACTIVE** Pulsara account with your agency or facility.
<https://www.pulsara.com/texas-resources>
- Have access to the Pulsara Application via smartphone, tablet, or desktop (HQ) on the day of the drill. <https://www.pulsara.com/faqs/which-web-browsers-and-mobile-devices-can-we-use>
- Pulsara Application on mobile device **MUST** be updated to version 39+ or better to participate in the drill.
- Have access to receive patient cards via email (NCTTRAC provided) on the day of the drill.
- Have **ALREADY** been **TRAINED** on Pulsara and its basic functionality.
<https://www.pulsara.com/texas-resources>
- Each participating hospital user **MUST** be visible to EMS to receive simulated EMS transports (you can reach out to the Pulsara Team to confirm by emailing isa.rapp@pulsara.com)
- Each participating hospital user **MUST** have their status set to “On Call” to allow for notifications to be received from EMS when a patient is in-bound.
<https://knowledge.pulsara.com/en/managing-call-status>
- Review the following Demo MCI Training video: [NCTTRAC DEMO MCI Training Overview](#)

**Participants will receive
HPP Performance Measure credit once completed.**

HPP - HOSPITAL PREPAREDNESS PROGRAM

EXERCISES

MEDICAL RESPONSE SURGE EXERCISE (MRSE)

The MRSE uses a surge scenario to help healthcare coalitions and other stakeholders assess how well their members can work together to respond to a sudden health care crisis. It is an exercise designed to test a coalition's functional surge capacity and to identify gaps in surge planning.
